

6 Litchfield Terrace
Regents Park

H. W.
June 16 179

My dear Sir,

I forward by this
post for your kind ac-
-ceptance a copy of my
book on Floral Dissections.

Though it is of course
especially intended for
English students, I think
it would be of some assistance
to Americans as well. —

If, therefore, in respect
you approve of it, I
should be much obliged
if you could aid its
introduction amongst

at least classes or
students that you may
be able to do. Perhaps,
you would kindly notice
it in Silliman's or other
journal.

I trust you will have
received a few days ago
two papers on Phyllotaxis
which I have forwarded
to you. — I have not
yet had the pleasure
of reading yr article of
"My Self-Fertilization."
You will doubtless have
seen that I do not
dispute the facts of ulmeria
only the interpretation;

and what I consider
to be an illogical deduc-
-tion, as to "Impurification"
&c.

Believe me to be

Yours very faithfully

Geo. Henslow
